

SENT ON BEHALF OF Texas A&M AgriLife Extension Service Director Dr. Jeff Hyde

March 25, 2020

Extension colleagues,

COVID-19 has created a tremendous amount of anxiety, uncertainty, and frustration for those of us in AgriLife Extension. In a very short time, it has completely changed the way that we work and interact with each other, our clientele, and partners. As we each become increasingly isolated from others, at least physically, I wanted to connect with you in a slightly more direct way than simply the emails that we have been sending.

I will be hosting a **webinar tomorrow afternoon (Thursday, March 26, from 3-4 p.m.)** to discuss the latest on the pandemic and the agency's response to it.

I hope you will participate in this event!

As part of this event, I'm excited to have Dr. Monty Dozier provide the latest on the COVID-19 outbreak and how our DAR (Disaster Assessment and Recovery) agents, and others, are responding. Caitlyn Calvert and Katie Hancock will also join to talk about digital engagement. The pandemic has propelled us into more digital-centric programming approaches, so their session should be helpful for you.

I'm excited to connect with you tomorrow afternoon. More details about how to connect are below.

Jeffrey Hyde
Director, Texas A&M AgriLife Extension

Please carefully review the instructions below on how to join this online broadcast and we look forward to you attending this event:

COVID-19 Agency Update: Texas A&M AgriLife Extension Service – Live Event

Live Event Link: <https://bit.ly/2xoNQeq>

Viewing Instructions:

For attendees without Microsoft Teams Installed:

1. Click on the **"WATCH ON THE WEB INSTEAD"** button in the middle of the screen
2. Then click in on the **"JOIN ANONYMOUSLY"** link on the next screen.

Note: The Safari web browser is not currently supported. Mac users should utilize the Chrome web browser.

Live Event Playback:

To watch the Live Event recording simply click on the Live Event link after the live event has ended.

Subtitles are provided in both English and Spanish in the playback controls.

Blair L. Fannin
